

Poultry adventures in Ethiopia; travelling abroad for research and cultural immersion

By Madelaine Empey

June 24th 2020

Prairie Poultry Meeting

The objective of this presentation is to discuss the advantages of doing research in another country, touching on expectations, how to prepare, and how to deal with possible setbacks. This is especially useful to those planning on doing research abroad in the future. Key points include discussing planning, what equipment to bring, safety, cultural differences and respect, and how to make the best of opportunities to research abroad.
